

OP6

The OP6 outdoor wall mount speaker combines a bass enhancing passive radiator with a 6.5" polypropylene woofer and a 1" aluminum coaxial tweeter to provide crystal clear highs and lows. The OP6 features our Patent Pending Quick Lock™ mounting technology that makes installation a breeze. Quick Lock™ technology allows installers to terminate the wire directly to the wall mount, mount the speaker to complete the termination, adjust the angle and lock it into place using the lever. The OP6 is available in white or black finishes to match any decor.
